Subject: Winrock Solar and Vegetation

Solar

So this is how Sunpower illustrates "Impact" of solar power on our dashboard:

This is really basic, and keep in mind it's based upon national averages. I will follow up with hopefully a different graphic that actually applies to our system. I am waiting on the monthly report for this.

I have the raw numbers, but nothing to show for them. At the very least, using the examples above, we can manually calculate our impact.

Vegetation at Winrock

current trees:

pomegranate
apple
peach
nectarine
pear
plum
cherry
jujube
quince
fig
pecan

current vines:

grapes

current shrubs/herbs:
